Examination	Institute	Year
B.Tech, Textile Engineering (Minor: Business Mgmt.)	IIT Delhi	2025

JEE Mains 2021: All India Rank 794 (top 0.07% of 1M+) | NTSE Stage 1 (top 0.002%) | SOF Maths Olympiad Gold

PROFESSIONAL EXPERIENCE	
Aspect Ratio Analyst, AI & Strategy Consulting [Jun'25 - Aug'26]	Embedded with a global pharma's Vaccines Commercial team Shipped AI apps to 3 client teams
	Persona Design - Owned an HCP persona chatbot end to end for 3 prescriber segments; no precedent - Mapped rated beliefs, behaviours, barriers & decision drivers to selection priorities - Turned each into plain-English interpretation & implied stance as system prompts - Used PersonaCraft, PsychAdapter & PersonaLLM; kept ties & unmapped data explicit
	RAG Architecture - Architected multi-agent RAG: routing agents over hybrid semantic + BM25 search - Framed the brief with the marketing team; shipped over the client's local network
	Evaluation & Impact - Built an evaluation framework of test scenarios & failure paths; accuracy to 94% - Iterated chunking, embedding & search strategy on measured results, not intuition - Validated by 10 users, then handed to a large consultancy for production build-out
	AI Enablement - Built a tender guidance tool for the global bidding team: 40+ countries, 5 vaccines - Wrote 4 Python scrapers (httpx, BeautifulSoup) turning no-API sites into datasets - Researched AI use cases (HCP engagement, MLR review) and briefed VP+ leadership - Wrote AI case studies on Pfizer's Charlie platform, Sanofi & Aktana for leadership
Grant Thornton Bharat Summer Trainee, Public Sector Consulting [May'24 - Jul'24]	On site, client office in New Delhi Government of India programme Letter of Recommendation - Built a Power BI dashboard tracking 287 resources by state & designation, giving live visibility - Analysed performance data for trends & penalties; managed QA of 2,000+ compliance documents
KEY PROJECTS	
Legal Precedent Search Startup [Aug'26 - Sep'26]	Hybrid-search RAG over 5M+ court judgements from 20+ courts Legal precedent research startup - Reviewed RAG research; tested chunking strategies, search algorithms & models on legal text Reverse-engineered private APIs to scrape judgements, replacing Selenium and saving ~10 days - Ran BM25 search, vector-DB queries & re-ranking in parallel on Azure VMs, cutting latency by 25%
RAG Eval Harness Portfolio Project [Ongoing]	Open-source harness to score RAG configs and compare them case by case Public & synthetic data - Scores retrieval deterministically (hit@k, recall@k) separately from generation to isolate failures - Uses LLM-as-judge for correctness & faithfulness; checks the bot refuses out-of-scope questions - Compares two configs per case to surface category-level regressions that aggregate averages hide - Logs run manifests (model, k, dataset hash, git commit) and case IDs; every failure is recorded
Outreach Engine Personalised B2B Email [Ongoing]	LLM-personalised outreach for a family cotton-thread manufacturer's B2B buyers Also for job search - Generates a personalised email per recipient from a spreadsheet list, context & a base message - Enforces grounding structurally: personalisation may only use facts supplied for that recipient - Designed for deliverability, suppression lists & compliance, with reply classification & threading
Membership CRM AI Voice & Messaging [2026]	Operational software for gyms & subscription businesses Built for non-technical front-desk staff - Automated follow-ups across the member lifecycle with AI voice calls (Ringg.ai) and Twilio - Built lifecycle workflows on a TypeScript front end and Firebase back end, deployed on Vercel
Plan My Day AI Productivity Agent [2026]	AI coaching app for task management & goal breakdown Used daily in single-user mode - Wrote the spec and directed the build, then migrated it to a local FastAPI + SQLite + Gemini stack - Added a floating AI assistant; shipped behind a one-click Windows launcher, no setup needed
LEADERSHIP & ORGANISATIONAL ROLES	
IIT Delhi	Coordinator, Tryst : led a 3-tier team of 30 on guest lectures ShARE : selected 1 of 8 from 100+
Aspect Ratio	Mentored an intern through his full internship: scoped the project , set direction, reviewed his work
TECHNICAL SKILLS	
AI / LLM	RAG (hybrid semantic + BM25, re-ranking), vector DBs, embeddings & chunking, multi-agent AI LLM evaluation (failure paths, LLM-as-judge), prompt engineering, structured outputs (Pydantic)
Engineering	Python, SQL (MySQL, SQLite), FastAPI, web scraping (httpx, BeautifulSoup), OpenAI & Gemini APIs
